Business data engineering manager | Data platforms & Governance

Business data engineering lead with 10+ years of experience designing, governing, and operating data platforms in regulated environments. Strong background supporting quality, audit, and compliance use cases within large datasets, ensuring data integrity, traceability, and readiness for analytics and AI/ML initiatives when needed. Proven ability to partner with business and technology stakeholders to deliver scalable, high-quality data solutions.

WORK EXPERIENCE

ThruIQ - Data & AI

www.thruiq.com

Founder & Principal - Freelancer

08/2025 - Present

- Designed end-to-end Snowflake data architecture using Medallion pattern (Bronze/Silver/Gold) to support analytics and ML workloads.
- Implemented ELT pipelines using dbt and Snowflake, integrating APIs, cloud data sources, github actions and snowpipe.
- Built and tested predictive models for visa approval, food delivery demand, hotel reviews, loan default and student performance to gain business insights for marketing evaluation.
- Create experimental dashboards in Python and BI tools to explain customer behavior, market patterns and overall business performance for better competitive positioning.
- Built end-to-end measles risk analytics platform (AWS Lambda, S3, Snowflake, dbt, Snowflake ML, Tableau) predicting high-risk countries and automating CI/CD refresh

Cargill

Senior Software And BI Engineering Manager

12/2021 - 09/2025

- Led a full-stack development and business intelligence team of 22+ people serving Latin America and North America, delivering more than 20 solutions over 3 years with 94% client satisfaction.
- Delivered portfolio optimization and reporting using analytics that enabled 3M dollars in savings and reinvestment in CAPEX and OPEX.
- Managed development and individual development planning, leading a cross-functional team and collaborating with key stakeholders to align technology strategies and governance.
- Facilitated development plans with actionable feedback and mentoring that reduced attrition to 0% over 3 years and improved team engagement and stability, reaching 96% approval in internal employee surveys.
- Led adoption of ELT patterns and data modeling standards to improve scalability, performance, and data quality.

Senior Lead - Data Analytics

02/2020 - 12/2021

- Redesigned the analytics architecture, lowering monthly support tickets from +4 to 1 for the core reporting platform with the use of business intelligence tools (R, Power BI, SQL)
- Developed and implemented 45+ Tableau dashboards, moving key reports from manual spreadsheets to self-service views, bringing refresh times down from 3+ hours to seconds.
- Defined and implemented data governance practices (standards, documentation and QA) for the analytics team, improving reliability and audit readiness of reports and datasets.
- Accountable for the operational stability, performance, and continuous improvement of data platforms, including issue triage, root-cause analysis, and coordination with technical support teams.
- Reduced ELT time from 7 hours to 47 minutes and release time from 16 hours to about 1 hour, implementing scalable solutions that were trusted by senior stakeholders.

Pfizer

Data Analytics Specialist

07/2017 - 01/2020

- Owned and governed enterprise data platforms supporting quality, audit, and compliance use cases, ensuring data integrity, traceability, and alignment with regulatory requirements.

- Built Spotfire dashboards and scorecards that reduced manual reporting effort by around 42% for audit and compliance teams.
- Partnered with business stakeholders and audit teams to translate quality and compliance requirements into scalable data pipelines, dashboards, and governed analytics solutions.
- Migrated Excel files into Oracle using Alteryx and SQL, improving data mapping, data migration and loading time from 3 days to 10 minutes
- Gathered data from multiple sources and information systems, ensuring data quality, data integrity and data privacy in a regulated environment

Hewlett Packard - DXC

Business Intelligence Specialist

06/2015 - 06/2017

- Led 18-member team delivering analytics solutions with Power BI, Tableau, Vertica, Java, and SAP HANA.
- Acted as Scrum Master and lead developer for a key BI solution (Earth Insights), ensuring predictable releases and clear communication with stakeholders.
- Delivered BI and portfolio analytics solutions with Power BI, Tableau, Vertica, and SAP HANA, supporting executive decision-making and improving client retention by 17%.

Account Delivery Lead

06/2012 - 06/2015

- Led a team of 25 developers supporting 400+ applications in the Oil and Gas industry in Canada.
- Led escalation calls to tackle customer issues, coordinating with subject-matter experts and executive stakeholders; improved SLA compliance from 58% to 89% and reduced breaches from 42% to 4%.
- Worked collaboratively to refine internal OLAs and on-call rotations, reducing service escalations and improving the stability of production environments along with business operations.

Technology Consultant

06/2010 - 06/2012

- Delivered FICO solutions developed in ABAP to streamlined financial operations for multinational organizations, cutting daily manual operations from 4 hours to less than 5 minutes.

EDUCATION

MSc Data Science & Artificial Intelligence (In progress)

University Of Liverpool

12/2026

Master Business Administration (Finance)

Instituto Tecnológico De Costa Rica

11/2012

BSc - Computer Engineering

Instituto Tecnológico De Costa Rica

10/2007

CERTIFICATIONS

Postgraduate in Data Science and Analytics

University of Texas at Austin

02/2025

Organizational Leadership

Harvard Business School.

12/2023

Lean Six Sigma - Yellow Belt Certification

Cargill

10/2023

Certified Scrum Master & Certified Product Owner

Scrum Inc.

04/2023

SKILLS

Data platforms & Engineering: Alteryx, APIs, AWS, Cloud Data Lakes, Data governance, Data Management, Data Quality, Data visualization, Data Warehousing, dbt, ETL/ELT, GCP, PostgreSQL, Python, Snowflake, SQL, Tableau

Data & Analytics: Cloud Analytics, Data driven analysis, Data Engineering, Data Pipeline, Monitoring, Workflows

Quality, governance & compliance: Actionable insight, Audit Readiness, Compliance, Data Governance, Data Integrity, Data Quality, Data Transformation, Metadata Management

Business & Leadership: Communication skills, Cost Optimization, People management, Problem-solving skills, Quality Management, Regulated Environments, Team leadership, Technology Strategies
